

ID_DRN	raw material	white patina	debitage type	dorsal negative pattern	technique	butt	typology	further description	worked material	trajectory	hafted	use-wear description
568_01 ŠI	KL I	no	noncortical flake, cortex residues	irregular	hard	plain	endscraper	short thick	unspecific	unspecific		Very light rounding of ventral edge (01). The endraper function cannot be proven. Short use, resistant raw material.
568_02 ŠI	KL II	yes	blade torsional	parallel	soft	plain	endscraper	bilateral abrupt retouch, blade oblique endscraper	hide	transversal		Left lateral ventrally rounded (02, 03), no striations, dorsal rounding minimal (01), abrupt low retouch, traces of orange non-formable residues, terminal ventral rounding pronounced (04). White patina (05).
568_03 ŠI	KL II	no	blade torsional	parallel	soft	dihedral	endscraper	bilateral abrupt retouch, blade flat endscraper	hide	transversal	yes	Dorsally large bright spot (01), right lateral bifacially lightly worn, with light striations (02), sharp boundary (04 a 05) to worn surface in upper part – together with bright spot clear prove of hafting. Terminally light rounding ventrally – endscraper.
568_04 ŠI	KL II	yes	blade undulated	parallel	soft	facetted	endscraper	narrow tiny endscraper retouch	hide	transversal		Clearly rounded terminal edge ventrally (01), laterals unworn, no bright spots. White patina (02).
568_05 ŠI	KL II	yes	fragment blade straight	parallel	x	x	endscraper	flat endscraper	hide	transversal		Clearly rounded terminal edge ventrally (01, 02), white patina (03)
568_06 ŠI	KL II and KL quartzite	yes	blade undulated	parallel	soft	facetted	endscraper	non-retouched endscraper	unspecific	unspecific		Vera weak terminal ventral rounding (01, 02), functional determination supported by the context of similar artefacts. White patina (03)
568_07 ŠI	KL II	no	blade curved	parallel	soft	dihedral	endscraper	bilateral abrupt low fine retouch, flat endscraper	hide	transversal	yes	Developed rounding of terminal ventral edge (01, 02) – middle worn endscraper, clear boundary of worn and unworn surface indicates hafting (03)
568_08 ŠI	KL I	no	blade torsional	parallel	soft	facetted	endscraper	bilateral abrupt low fine retouch, flat endscraper	hide	transversal	yes	Bifacially located bright spots with residues (01, 04, 05) – hafted, terminally ventrally intensively rounded (02, 03), long use
568_09 ŠI	KL II	yes	blade curved	parallel	soft	x	endscraper	bilateral abrupt low fine retouch, flat endscraper	hide	transversal		Strongly rounded ventral terminal edge (01), contaminated by pencil graphite directly on working edge (02). White patina (03).
568_10 ŠI	KL II	no	blade curved	parallel	soft	dihedral	driller	terminal fracture, high abrupt bilateral dorsal retouch	hard organic (bone/wood)	rotational		Rounded fracture (01) – used after the breakage, lateral edges alternately lightly polished – left from dorsal (03), right from ventral (02).
568_11 ŠI	KL I	yes	fragment noncortical flake	irregular	hard	x	endscraper + plane	longitudinally broken flake, high natural back opposite to the fracture, bifacial retouch	hide + hard organic	transversal		Ventrally endscraper pronounced rounding located on lateral edge (01), including direction indications (02). The edge is worn and rounded even dorsally – narrow glossy band – organic, but harder material – plane. White patina (04).
568_12 ŠI	KL II	yes	noncortical flake	parallel	hard	plain	ad hoc tool	hinge termination, 2 bulb cones – imprecise strike, ventral retouch from terminal edge, raw material defects	unspecific	unspecific		Dorsally rounded area in the interior close to side – hand holding (01). Similar wear ventrally. Unspecifically used. White patina (02)
568_13 ŠI	KL II	yes	repair noncortical flake	parallel	insubstantial	facetted	reparatory flake used as ad hoc tool	knapping defect on the breakage area	soft, later hard	unspecific		Ventrally both lateral edges with no rounding and gloss, microfractures along entire edges. Dorsally sharp edges, with microfractures, residue of older worn surface locally on right lateral (01) between two later negatives. Probably two-phase use – firstly by soft organic material, later by hard material. Microfractures were not caused by postdepositional damage. Light white patina (02)
568_14 ŠI	KL II	yes	flake with parallel dorsal negatives, natural back, cortex residues distally, curved	parallel	soft	plain	knife with natural back	flake from short bidirectional core	soft organic	unspecific		Ventrally pronouncedly rounded worn inner edge of the butt (01), similar soft rounding on the terminal edge on the right (02). Dorsally right lateral along entire edge rounded, no direction indications. Left lateral unworn, only on terminal edge. Unspecified soft rounding without gloss. Probably knife – unilateral wear. White patina (04).
568_15 ŠI	KL II	no	fragment blade, cortical back, curved	parallel	soft	facetted	ad hoc tool	broken by 2 fractures distally	soft organic	unspecific		Left lateral bifacially worn by microfractures (02). Terminal and right edge rounded without gloss (01).
568_16 ŠI	KL II	yes	blade torsional, cortex residues	parallel	soft	plain	ad hoc tool	unretouched	soft organic	unspecific		Ventrally left lateral unworn, right one worn from the point 2mm below the half (01). Dorsally upper third of left lateral rounded (02). Light white patina (03).
568_17 ŠI	KL II	yes	noncortical blade, natural/cortical back, curved	parallel	soft	plain	ad hoc tool	unretouched	unspecific	unspecific		Dorsally unworn. ventrally right lateral unspecifically worn invasively to the interior (01). White patina (02).
568_18 ŠI	KL II	yes	janus flake, cortical edge in basal half	x	hard	cortical	knife with cortical back	transversal macroscopic wear, change in raw material quality	semihard organic (dry hide/soft wood)	longitudinal		Transversal edge bifacially worn, narrow band of gloss and light rounding tied to the edge (01, 02), no direction indications. Organic harder material (dry hide/soft wood). White patina (03).
568_19 ŠI	KL II	yes	repair noncortical flake	parallel oblique	insubstantial	plain	reparatory flake used as ad hoc tool	reparatory half-tablet	hard organic (bone/wood)	unspecific		White patina (01). Edge opposite to back is worn – ventrally narrow glossy wear (02) by hard material – bright spot. Dorsally negative – unifacial wear.
568_20 ŠI	KL II	yes	semicortical, cortical distal edge	parallel	soft	plain	preparatory flake	decortication flake	x	x		Unworn, white patina (01).
568_21 ŠI	KL II	yes	flake with parallel dorsal negatives, cortical distal edge, curved	parallel	soft	plain	ad hoc tool	ventral lateral blunting	unspecific	unspecific		Blunt lateral without gloss, rounding and striations, opposite sharp lateral ventrally unworn, dorsally locally rounded edge (01). Light white patina (02)
568_22 ŠI	KL II	no	repair waste	x	x	x	reparatory flake	reparatory waste probably from core striking edge	x	x		Unidentified, white patina unidentified.
568_23 ŠI	KL II	yes	noncortical flake broken	parallel	soft	plain	ad hoc tool	unretouched	unspecific	unspecific		Unspecifically laterally worn on the left (01), white patina (02).
568_24 ŠI	KL I	yes	waste	x	hard	cortical	preparatory flake	decortication waste	x	x		Unidentified, white patina (01).
568_25 ŠI	KL II	yes	repair noncortical flake, cortical/natural back	irregular	hard	plain	reparatory flake	repair of exploitation area, natural back on the left, cortical back on the right	x	x		Unworn, reparatory debitage discarded after be knapped, white patina.
568_26 ŠI	KL II	yes	flake with parallel dorsal negatives, cortical distal edge, natural back, curved	parallel	soft	plain	debitage	imprecise strike with soft hammer caused both lip and scar	x	x		Unworn, white patina (01).
568_27 ŠI	KL II	yes	flake with parallel dorsal negatives, curved	parallel	soft	x	sickle	diagonal gloss, increasing intensity from the centre to the distal part, bipolar abrupt retouch, no back, irregularly ventrally serrated working edge	cereals	diagonal	yes	Sickle (01-03 increase of gloss intensity, ventral), locally resharpened by new negatives (04), cyclically – even those newest negatives show starting wear (05). White patina (06).
568_28 ŠI	KL II	yes	repair noncortical flake, undulated	parallel	soft	plain	reparatory flake used as chisel	repair of knapping defect of exploitation area from opposite direction, part of core platform on distal edge, macroscopically worn ventrally on the left and right	hard chipping	transversal		Chisel (01), white patina (01).
568_29 ŠI	KL II	no	repair noncortical flake	irregular	insubstantial	dihedral	reparatory flake	hing termination, reparatory flake from the core side	x	x		Unworn, patina nonidentified, raw material identification 01.
568_30 ŠI	KL II	yes	raw material fragment	x	x	x	raw material	natural fragment broken along old fissure	x	x		Unidentified, white patina (01).
568_31 ŠI	KL II	yes	waste, natural back	x	soft	plain	locally retouched tool	small waste, broken by strike to the ventral, fracture locally retouched	unspecific	unspecific		Right lateral unspecifically worn (01-03). Light white patina (04).
568_32 ŠI	KL II	yes	noncortical flake	parallel	soft	plain	locally retouched debitage	serrated local retouch on the left, broken distal edge, raw material defect	x	x		Unidentified, white patina (01).
568_33 ŠI	KL II	yes	noncortical flake, cortical and retouched back	parallel	soft	facetted	knife with retouched back	local retouch prolongate natural back in distal part of the right lateral	soft organic	unspecific		Endscaper wear on ventral edge of retouched part not proven (01), the retouch prolongate cortical back, serration on left lateral is lightly bifacially worn (02, 03). Direction indications non detected, nevertheless, due the state of edge and ergonomomy probably knife. White patina (04).
568_34 ŠI	KL II	yes	noncortical flake	parallel	insubstantial	dihedral	saw	short saw with unifacial retouch and large negative from base to manufacture stem, terminal ergonomic blunting, from plain irregular core	soft organic	unspecific		Serration bifacially worn with soft diffuse gloss and pronounced rounding, wide band of gloss, invasive to the interior – more likely softer material. Ventrally only rounded (01, 02), dorsally better visible distribution of the gloss on serration (03-08). Set of bright spots on central dent (06, 07). White patina (01, 07). Clear direction traces nonidentified.
568_35 ŠI	KL I	yes	flake with parallel dorsal negatives, natural back, curved	parallel	bipolar	x	knife with natural back	flake from bidirectional core	soft organic	unspecific	yes	Along entire right part of the basis dorsally intensive hafting wear (01-05) – dense locations of bright spots. Right lateral edge well rounded along the entire edge (06), ventrally unworn, light rounding on the left (08). White patina (07). No direction indications. Terminally unworn. Knife.
568_36 ŠI	KL II	yes	cortical flake	x	hard	cortical	preparatory flake	primary (decalotation) flake, 100% cortex dorsal	x	x		Unidentified, white patina (01).
568_37 ŠI	KL II	yes	noncortical flake torsional	parallel	soft	plain	debitage	small flat broken flake	x	x		Unworn, white patina (01).
568_38 ŠI	KL II	yes	repair noncortical flake	parallel repair	insubstantial	plain	reparatory flake	repair of knapping defects on exploitation area, wide flat scale	x	x		Unworn, white patina (01).
568_39 ŠI	MJR	yes	repair noncortical flake	irregular	hard	plain	reparatory flake	double-bulb, flat, wide, repair of core striking edge	x	x		Unworn, white patina (01).
568_40 ŠI	MJR	yes	noncortical flake, cortical back	x	insubstantial	plain	preparatory flake used as ad hoc tool	decortication flake, right lateral edge worn	unspecific	unspecific		Ventral left proximal – residuum (01), white patina (02), short ad hoc use (03).
568_41 ŠI	KL II	yes	waste	x	insubstantial	x	debitage	cortical waste	x	x		Unidentified, white patina (01).
568_42 ŠI	KL II	yes	waste	parallel	insubstantial	plain	debitage	scale	x	x		Unidentified, white patina (01).
568_43 ŠI	KL II	yes	waste	x	insubstantial	x	debitage	cortical fragment	x	x		Unidentified, white patina (01).
568_44 ŠI	KL II	yes	fragment noncortical flake	parallel	x	x	trapezoid	mesial fragment, bipolar abrupt dorsal retouch	x	x		Sharp lateral unworn, ventrally bipolar unspecified light rounding (02). White patina (01).
568_45 ŠI	KL II	yes	fragment semicortical flake	irregular	x	x	endscraper	mesial fragment	hide	transversal		Basal ventral edge rounded, transversal use ergonomomy, function of endcraper (01, 02). White patina (03).

Tab. 2. Complete description of the lithics from Drnholec – Lidická Street, feature 568. Abbreviations: x – impossible to identify, Raw materials KL – Krumlovský Les type chert, MJR – Moravian Jurassic chert.

Tab. 2. Kompletní popis štípaných artefaktů z Drnholce – Lidické ul., objektu 568. Zkratky: x – nebylo možné zjistit, suroviny KL – rohovec typu Krumlovský les, MJR – moravský jurský rohovec.
